SOLVE-4010	Solvent Pen (for removing opaqing liquid)	0.05

Image Remover Pens

Designed for quick and easy chemical removal of unwanted images. Corrections can be made during plate making or on press. Base-Line Image Removers are specially formulated for different film and plate materials: electrostatic, Silvermaster®, photo imagesetting papers and stats, all negative or positive pre-sensitized plates and film, the CTP and polyester laser plates.

Image Remover Pens for Electrostatic Plates

Work with Itek, ABDick®, 3M®, Mitsubishi®, Iwatsu®, or any other dry or wet electrostatic masters. Treated area is non-receptive to ink.

ELECT-7003	Electrostatic Plate - Fine Tip	0.05
ELECT-7004	Electrostatic Plate - Broad Tip	0.05

Image Remover Pens for Silvermaster Plates

These pens work with any "black plate" such as Silvermaster or Megalith/Itek®.

The treated area is non-receptive to ink.

SILVE-5001	Silver Plate - Fine Tip	0.05
SILVE-5002	Silver Plate - Broad Tip	0.05

Image Remover Pens for Positive or Negative Pre-sensitized Plates

These pens work with all types of metal plates, including Kodak®, Enco®, Dupont®, Howson®, Western®, 3M®, and Fuji®.

They can also be used on diffusion transfer plates.

PLATE-1001	Metal Plate - Fine Tip	0.05
PLATE-1002	Metal Plate - Broad Tip	0.05

CTP Deletion Pen for Metal Plates

This pen works with CTP, long-run, and fast-exposure metal plates that are used on web and sheet fed presses. CTP-1000 pen features a unique 3-tip barrel with fine, medium, and broad tips.

CTP-1000	CTP Deletion Pen - 3 tip	0.05

BASE-LINE GRAPHIC ARTS PEN PRODUCT SELECTOR

<i>Product number</i>	<i>Description</i>	<i>Weight per Package</i>
Image Addition Pens		
Designed to make quick and easy additions to images on the plate. Corrections can be made during plate making process or on press. Our Image Addition pens are specially formulated for different plate materials: electrostatic, Silvermaster®, all negative or positive pre-sensitized plates, and CTP plates.		
Image Addition Pen for Electrostatic Plates		
This pen adds images to all paper masters.		
ELECT-7002	Electrostatic Plate - Fine Tip	0.05
Image Addition Pen for Silvermaster Plates		
This pen adds images to "black plates" such as Silvermaster or Megalith/itek®.		
SILVE-5000	Silver Plate - Fine Tip	0.05
Image Addition Pens for Positive or Negative Pre-sensitized Plates		
These pens add images to all types of grained and ungrained aluminum plates, and can be used during plate making or on press.		
PLATE-2001	Metal Plate - Fine Tip	0.05
PLATE-2002	Metal Plate - Broad Tip	0.05
Long Run Addition Pen for Metal Plates		
Adds images to all types of metal plates from analog to CTP. The pen utilizes a two-step process: first, a prep tip is used to prepare the plate surface, then the pen's two additional tips make corrections that last for countless impressions.		
CTP-2000	CTP Addition Pen - 3 tip	0.05
